

COURSE GUIDE

Practical skills and industry discovery | 2026-27 proposed programs

Start with a free first look, a practical workshop or a longer program. No prior signage experience is needed for the beginner options.

FREE DISCOVERY DAY

3 hours | Free

A hands-on introduction to signage for first-timers. Explore tools, materials, machinery and the career paths behind the finished sign.

You will explore: Signage careers; vinyl and window films; printers and plotters; ACM, acrylic and corflute; practical demonstrations.

SIGNAGE ESSENTIALS

2-day workshop | \$249 indicative

Try the core skills of working with signage and vinyl. Made for beginners, hobbyists, business owners and new employees.

You will explore: Tool safety; surface preparation; measuring and positioning; vinyl types; application and trimming; practical projects.

6-WEEK SKILLS COURSE

Thursday evenings, 6-9 pm | \$699 indicative

Build confidence through structured practical sessions in materials, production, vinyl application and installation fundamentals.

You will explore: Cast and calendared vinyl; air-release film; frosting; one-way vision; laminates; substrates; troubleshooting and projects.

12-WEEK SIGNAGE PROGRAM

Tuesday evenings, 6-9 pm | \$1,499 indicative

Explore more of the professional workflow, from design and production through preparation, application and installation.

You will explore: Production workflows; laminating; window and vehicle graphics; installation planning; tools; quality control and projects.

SCHOOL PROGRAMS

Half or full day | Quote on request

A tailored introduction to the signage industry for school groups, career coordinators and students.

You will explore: Industry pathways; material and equipment demonstrations; vinyl application; practical projects and industry Q&A.

Dates and enrolment

Proposed intakes are subject to confirmation. Register your interest online or complete the printable form. SASA will confirm dates, venue, availability and final fees before enrolment. No payment is needed to express interest.

These programs are practical skills and industry education. They are not advertised as accredited training. Any formally approved accredited pathway will be identified separately.
